Experience

Villa Group Resorts & Spas — Puerto Vallarta, Jalisco
Junior ERP Developer — August 2025 – September 2026

- Developed requisition, purchasing, inventory, and accounting modules with unit tests for an Odoo ERP intended to replace Avance; the project reached staging before departure.
- Built an API integration in staging to generate daily draft income journal entries from POS data, mapping 491 accounts and handling exchange rates.
- Upgraded a production Odoo Enterprise maintenance instance from v17 to v19 using Odoo's upgrade service, custom scripts, and module updates for consolidation with the ~600-user POS database.
- Migrated 2,000+ equipment records from legacy MP9 into Odoo for six resorts, coordinating catalog cleanup with each property and growing coverage from 1 to 7 properties.

Beracah Médica — Hermosillo, Sonora
Junior Software Engineer — October 2023 – August 2025

- Customized Odoo's checkout to resume payment after supplier confirmation for dropshipping orders on a website processing MXN 100K+ in sales in its first two months.
- Developed Odoo scheduled jobs to export pricing data to AWS S3 and modified Magento 2 price-update logic to keep prices aligned during the migration to Odoo.
- Implemented the domain move and 301 redirects during a three-person migration of 10,000+ products from Magento 2 to Odoo Enterprise.

Coinsamatik — Hermosillo, Sonora
Application Engineer — September 2021 – June 2023

- Developed a C++ application for daily flowmeter reporting to Mexico's national water authority via FTP, integrating a Phoenix Contact PLC and HMI and reaching testing before departure.

Projects

Personal Finance

- Built a multi-user personal finance application for tracking transactions, investments, budgets, and net worth with Next.js and Supabase.
- Implemented server-side data access using Next.js Server Components and Server Actions, Supabase Auth, and PostgreSQL Row-Level Security.

Skills

Languages: Python, TypeScript, JavaScript, SQL, C++
Frameworks, Data & APIs: Odoo (16–19), Next.js, PostgreSQL, Supabase, API integration
Tools & Testing: Git, Docker, Linux/WSL, Azure DevOps, Python unittest

Education

Universidad de Sonora — B.Sc. in Mechatronics Engineering — Hermosillo, Sonora — 2015 – 2020
